

Prof. Mohammed Bouachrine is currently Professor in the High School of Technology (ESTM) University Moulay Ismail of Meknes- Morocco and member of LASMAR “Laboratory of Spectrometry, Materials and Archaeomaterials” in Faculty of Sciences of Meknes. He has occupied a post of Head of Department of Biology, Chemistry and Earth Science in Faculty of Taza, University Sidi Mohamed Ben Abdellah.

He received his Ph.D (Doctorat) from Montpellier University, in France. After his Ph.D. he became an assistant professor at the university Moulay Ismail and He pursued his postdoctoral work at High School of Chemistry in Montpellier (ENSCM). As of 2000, he obtained his (Doctorat d’Etat) in University Moulay Ismail of Meknes. His area of research includes synthesis and physicochemical properties of organic materials based on pi-conjugated molecules, vibrational spectroscopy, optoelectronic properties and quantum chemical calculations. Additionally his research interest is moreover directed towards the field of quantum chemical study of corrosion phenomena, toxicity, odor, environment and pollution. He has published 03 books and more than 100 research papers in various reputed international journals.
