Brazil

He holds a doctorate in Engineering and Materials Science from the State University of the North Fluminense Darcy Ribeiro (2001) and a degree in Mechanical Engineering from Santa Úrsula University (1991).

CNPq research productivity fellow and Scientist of Our State by FAPERJ. He trained 11 doctors and 30 masters and published more than 170 complete articles in specialized magazines and more than 260 in conference proceedings. He is an ad hoc consultant for national and international magazines.

He was Dean of Research and Graduate Studies at UENF. He is currently a professor at the State University of the North Fluminense Darcy Ribeiro and coordinator of the Post-Graduate Program in Engineering and Materials Science.

He has experience in Engineering and Materials Science, with an emphasis on traditional ceramic materials and composite materials, acting mainly on the following themes: characterization of raw materials, mass formulation and incorporation of residues in clayey ceramic materials, geopolymers, artificial rocks and polymeric composites reinforced with natural fibers.
