Prof. Dr. Junhu WANG

Prof. Junhu Wang is a full professor at Dalian Institute of Chemical Physics, Chinese Academy of Sciences. He received the Ph.D. in inorganic and radiochemistry from Toho University, Japan (2002). He was a research fellow at the National Institute for Materials Science (NIMS) and National Institute of Advanced Industrial Science and Technology (AIST), Japan (2002-2004).

In 2004 he was appointed as an associate researcher at Chukyo University, Japan. He has been Secretary General, Mössbauer Effect Data Center and Executive Editor of Mössbauer Effect Reference and Data Journal (2010-Present). His current research interests include the applications of Mössbauer spectroscopy in chemistry, catalysis and deep space exploration, development and characterization of the novel nanocomposite functional materials for industrial catalysis and adsorption.
